

## ABOUT STACK MATCH

Stack Match is an independent UK review and comparison site for business software. We help small business owners, accountants and bookkeepers choose the right tools through detailed reviews, side by side comparisons and UK pricing guides. Everything is written for the reader first. Commission never moves a rating, softens a criticism or changes a ranking.

## WHAT WE COVER

Accounting

Payroll

HR

CRM

ERP

More than 30 products reviewed and compared, including Sage, Xero, QuickBooks, FreeAgent, BrightPay and Zoho.

## CONTENT FORMATS

- In depth product reviews with scored rating dimensions
- Side by side comparison pages
- UK pricing guides and plan breakdowns
- Alternatives pages for every product
- Practical buying guides on the blog

## OUR STANDARDS

- Clear affiliate disclosure on every page where links appear
- Public editorial policy and review methodology
- Reader reviews are moderated before publishing
- UK GDPR consent records behind every email signup
- Prices and product details checked by hand

## WHO READS STACK MATCH

UK small business owners, accountants and bookkeepers who are actively researching their next software purchase. Readers arrive through organic search with clear commercial intent and use our reviews, comparisons and pricing pages to build a shortlist before they buy.

## PARTNER WITH US

Affiliate placements sit next to the content buyers read last before choosing, our reviews, comparison tables and pricing sections. We work on CPA through affiliate networks such as impact.com. Product listings, comparison inclusion and category placements are open to vendors that genuinely fit our readers. We are a young site growing deliberately, and we would rather represent a small set of products well than every product badly.
